11 millions  
users in 186  
countries

47 languages  
supported  
(by community)

# GLPI Network vs. GLPI Open Source

GLPI Open Source	GLPI Network
Support : No official technical support	Technical support from Teclib
Security : Users themselves are responsible for security, configuration and updates	Quick and regular security updates as well as critical bug fixes
Hosting : Users are responsible for installing, hosting, and maintaining the software	Choose between cloud-hosted or on-premise with full implementation support offered by Wuerth Pheonix

# GLPI Network Cloud #

# GLPI Network On Premise

GLPI Network Cloud	GLPI Network On Premise
45 days FREE trial	3 Level of Subscription
Unlimited Assets	1 to 4 Production + Testing Instances
Instance Maintenance / Upgrades Included	Support Level 3 for Featured Plugins
Tailor-Made Offers	Remote Technical Assistance from Teclib'

# GLPI magic: all features on one platform!

## CMDB

Manage [hardware, software and data centers](#). Link Asset inventory to Helpdesk and get 360° control of your IT and business infrastructure.

## Helpdesk

[Organize your support easily](#) with GLPI: manage incidents/requests, create forms, define SLAs, [deliver the best experience](#) to your customers.

## Financial Management

Track your [expenses, contracts and suppliers](#), create new inventory objects, manage user database and make reports.

## Administration

[Take control over users](#): define entities, create profiles and restrict access to information. With GLPI rules, you can [define roles of each member](#) of directory and setup workflow for Helpdesk and Inventory.

## Project Management

[Manage projects with GLPI](#): assign tasks, add collaborators, set up deadlines. Create reports and [explore Kanban boards](#) to organize your team!

# GLPI 11 and new plugins

- Plugin Carbon
- Unread
- AI

GLPI by  teclib'

# Plugin Carbon

# Environmental Impact of Digital Technology

R&D project with IRT-SystemX, Airbus Protect, Total Energies, AFNIC

- Measuring the environmental impact of IT
- Hardware
- Outsourced services
- Scope
- Life cycle
- Impact type (CO2, resource depletion, acidification, radiation, etc.)
- Energy

# Plugin Goals

## Measuring the environmental impact of IT

- Hardware
- Outsourced services

## Scope

- Life cycle
- Impact type (CO2, resource depletion, acidification, radiation, etc.)
- Energy
- Added value
- Optimization of energy consumption
- Extension of hardware life cycle

# Reporting

- Power
- Energy
- CO2 emissions
- By computer type
- Methodological information
- Quality of source data

# Roadmap

- Use of external data
- Carbon intensity of electricity (RTE, electricitymaps)
- Databases (ADEME, boavizta)
- Validation on real inventories
- Addition of impacts other than CO2 emissions (manufacturing, recycling)

GLPI by  teclib'

# New plugins

# Unread plugin

This plugin helps you to keep track of unread messages while you were offline and don't want to miss any messages that could have been sent, and you should be aware of.

## Notification bell

The plugin adds a new notification bell in the top right corner so you can keep track of everything you need to. This notification bell lists all your unread messages.

## List indicator

When you open the ticket list, all the tickets with unread messages are highlighted, and you can choose the one you want to know more about.

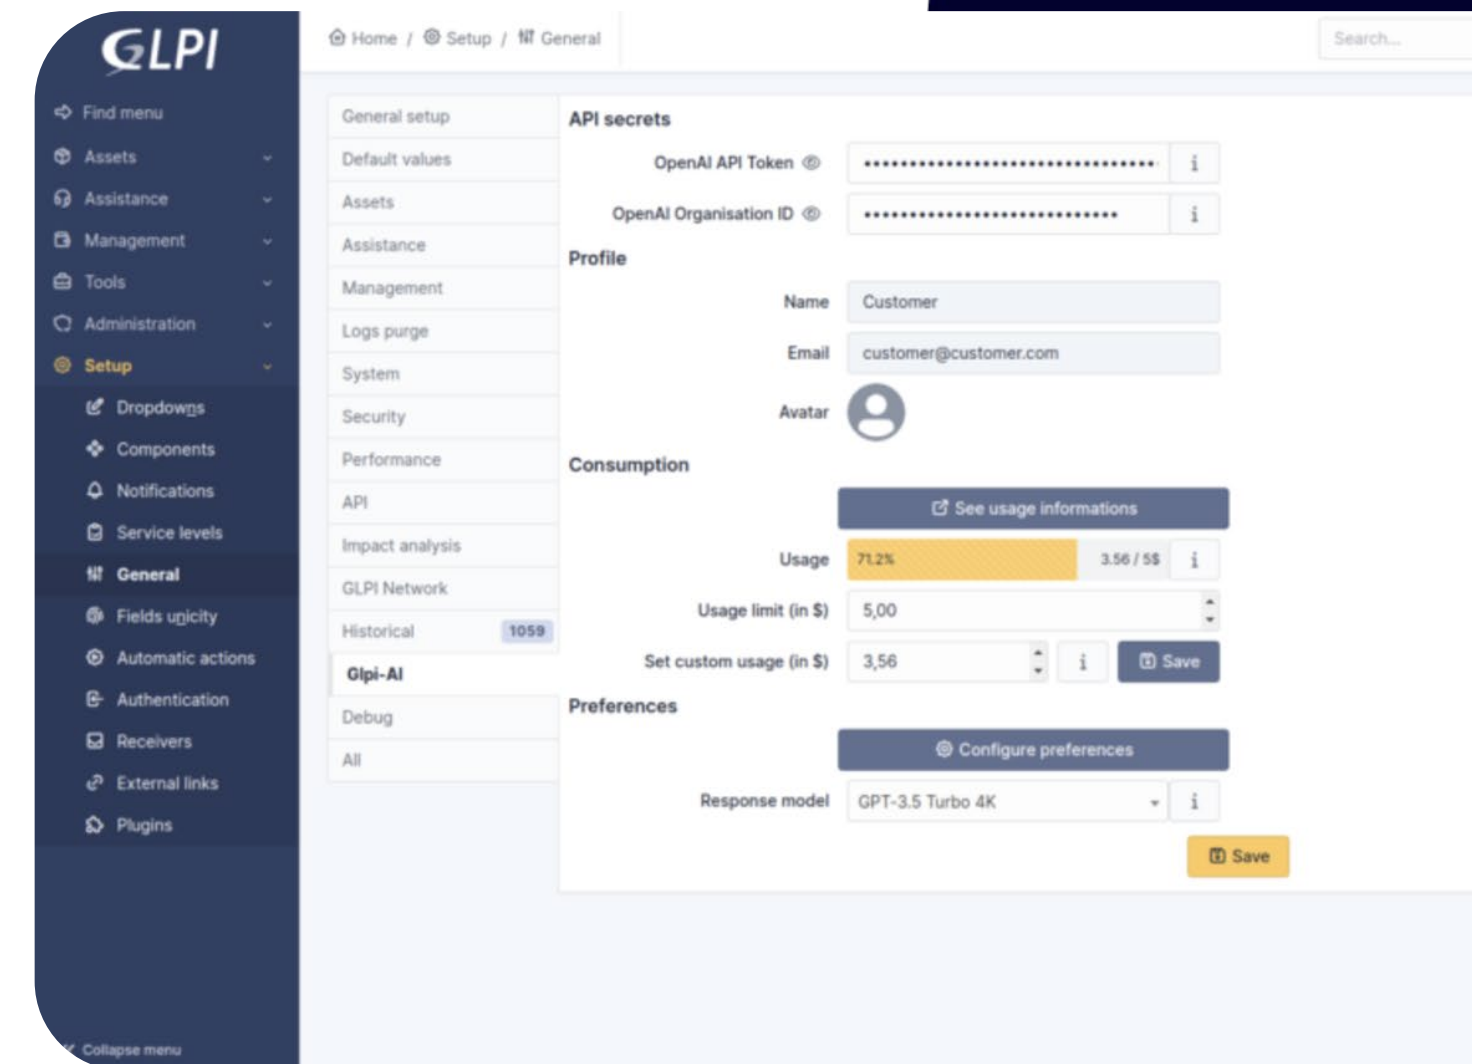

The screenshot displays the GLPI web interface with the Unread plugin integrated. On the top right, a 'Notification bell' icon is visible, which, when clicked, opens a panel titled 'Unread message(s)'. This panel lists unread messages, including a request from 'GLPI - Formcreator' and a bug report from 'GLPI 10.0.10 sous Lin'. Below the notification bell, the 'Tickets' list is shown. Tickets with unread messages are highlighted in orange. The list includes columns for ID, Title, Entity, Status, Priority, Opening Date, and Urgency. The bottom of the interface shows pagination information: 'Showing 1 to 20 of 22 rows'.

ID	TITLE	ENTITY	STATUS	PRIORITY	OPENING DATE	URGENCY
51	Ticket	Root entity	Processing (assigned)	Medium	2023-11-17 14:42	Medium
27	Ticket with unread messages	Root entity	Processing (assigned)	High	2023-10-19 12:06	Very high
50	Ticket	Root entity	Processing (assigned)	Medium	2023-11-17 14:33	Medium
49	Ticket	Root entity	Processing (assigned)	Medium	2023-11-17 14:32	Medium
48	Ticket	Root entity	Processing (assigned)	Medium	2023-11-17 14:32	Medium
47	Ticket	Root entity	Processing (assigned)	Medium	2023-11-17 14:31	Medium
46	Ticket	Root entity	Processing (assigned)	Medium	2023-11-17 14:24	Medium
45	Ticket	Root entity	Processing (assigned)	Medium	2023-11-17 14:24	Medium
44	Ticket	Root entity	Processing (assigned)	Medium	2023-11-17 14:24	Medium
43	Ticket	Root entity	Processing (assigned)	Medium	2023-11-17 14:24	Medium
42	Ticket	Root entity	Processing (assigned)	Medium	2023-11-17 14:24	Medium
41	Ticket	Root entity	Processing (assigned)	Medium	2023-11-17 14:23	Medium

# GLPI-AI

This plugin adds the ability to summarize the timeline items of tickets using the Open AI API.

- Summarize whole ticket timeline
- See cached summaries
- Refresh summaries
- Set AI context & style
- Set AI language
- Choose AI model
- Restrict API usage
- Summarization right management

# Grazie!
